

ThermoStrip® DL – Dishwasher Temperature Label

ThermoStrip® DL is a self-adhering and waterproof colorchanging label that measures the surface temperature of dishware in dish washing machines. Using ThermoStrip® DL on a dish surface with each wash cycle will provide a record that the proper sanitation temperature has been reached.

Section 4.7 of the FDA Food Code calls for measuring sanitized food contact surfaces and utensils by an irreversible registering temperature indicator.

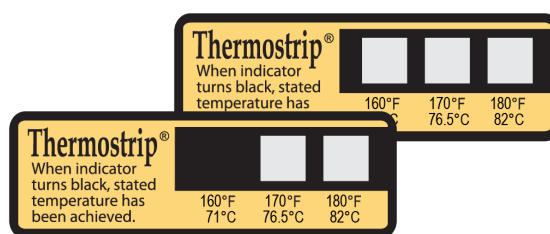

- Waterproof irreversible labels provide proof that disinfecting temperature has been reached
- Labels change from white to black permanently when temperature has been attained
- Adhesive backed
- Remove and retain as a permanent record of temperature attained
- Proof for HACCP Compliance
- Accurate to +/- 1°C/2°F of rated temperature

Water Temperature Disinfection Indicator

How to Use

1. Attach to the thickest clean dry dish
2. Place labeled dish/utensil in dishwasher and run dishwasher
3. Read label – It will turn from white to black when surface reaches rated temperature
4. Remove label and attach to dishwasher documentation

Specifications

Part No.	Description	Temperature	Size
P9007-24	Single Temperature Point Label	160°F / 71°C	½" × 1¾"
P9008-16	Three Temperature Point Label	160° 170° 180°F 71° 76.5° 82°C	½" × 1¾"
